Spanish Reading and Conversation

This is an advanced intermediate class which will be conducted primarily in Spanish but with English explanations as required. Different short stories will be made available the week before the class and will be read aloud and discussed in the class. A typical lesson plan would be:

- Introductory conversation including weather and current events
- A discussion of the vocabulary and any important grammar in the story
- Each student reading a segment of the story aloud to practice pronunciation
- An overall discussion of the story
- A Spanish language song to close out the class
