

Course Content for **German Short Stories 5** Fall 2023

This course continues the series of four previous semesters. As before, the content will consist of short stories by German writers, mostly of the WWII period. The intention is to increase vocabulary and fluency and understanding of grammar. Texts (approximately 8 to 10 stories) will be provided by the instructor and sent in advance for students to familiarize themselves with the vocabulary. Participants will take turns in reading aloud and translating and the instructor will make corrections if needed. Each story may take from one to two weeks, followed by a discussion relating to the content, style, and historical background.
