

ECO TEAM

The class will meet in person and COVID safe space whenever we can meet outside at OLLI. We know that this personal contact facilitates getting work done with like minded folks. We share our progress each week and invite everyone to comment in order to further our goals and encourage whole group participation.

Our goal last year was to set up tables during EARTH WEEK that reflected our desires to have a greener world. We encouraged members to learn and plant native species, to participate in greener homes and buy electrical cars, to learn about and recycle most plastics through Eco Plastic, Inc.

This year we hope to align ourselves with UDEL's stated goals on becoming much more environmentally friendly. Our ideal is to become a stellar campus by implementing as many of the Sustainability goals on our campus as possible. We will educate ourselves about these goals and how they pertain to our campus. We will work with OLLI staff to accomplish this. We will invite the whole of Life Long learning communities to support these efforts.
