

Advanced Alcohol Inks: Creating Art with a Little Help from Your Friends

A first-time offered alcohol ink class, this course will be taught online but all students are expected to participate in discussion and creating the art that we'll be learning about.

Each class will center around a particular project that everyone will be able to complete. The first project or two will be demonstrated by the instructor as we work together on the same type of piece. Students will be invited to suggest other projects or techniques and we will share our ideas and our work. For those that would prefer to start at the basic level, Starter Kits are available from the instructor as are supply lists if you want to shop on your own. This is a chance to really see what alcohol inks can do; you will gain confidence with the medium and have a ball.
