

Color, Creativity, Delight: Alcohol Inks Beginners/Intermediate

This class will be taught through zoom though students are encouraged to obtain supplies and participate in the projects at home with plenty of help and encouragement from the instructor. We will be introduced to the basics of alcohol inking and the tools used to manipulate the designing. A Starter Kit created by the instructor for this class has all the supplies a student will need. Additional items and inks can be added as desired by the student. We will tackle the basics during the first class, then move through many easy but impressive techniques using different substrates to experiment with: ceramic, metal, Yupo paper, and glass.
