

Beginner Bridge

Each student will be dealing cards and learning to play and bid with a partner, with partners rotated around the table so players can experience different playing styles. We will cover only basic bridge playing so students can leave class and play at home.

There is an assumption that each student will have knowledge of the hierarchy of a deck of cards. I.E aces higher than kings, kings higher than queens etc. Experience playing card games that involve "trick" taking is also needed. Depending on time and student willingness, we will cover scoring and basic bidding conventions to enhance skills. These add-ins will be determined by the progress of the students

This course is right for you IF;

- you have basic knowledge of the hierarchy of a deck of cards, ace higher than king, king is higher than queen, queen is higher than jack etc
- you have an understanding of card games that require taking tricks
- you're familiar with the 4 suits in a deck of cards, spades, hearts, diamonds, clubs
- you've played card games that involve a partner and require you work with a partner
