

Evidence of an Afterlife SYLLABUS

Course Description:

This course will cover a variety of topics in parapsychology, including After-Death Communication, Near-Death Experiences, Reincarnation, Pets in the Afterlife, and Psychics, Mediums & Channeling. There are many published papers in the literature that would be presented to support and explain the "evidence" in each of these topic areas that some form of an afterlife exists.

Course Objectives:

Upon completion, students will be able to:

1. Define the terms after-death communication, near-death experience, and reincarnation.
2. Detail basic facts about the science of parapsychology.
3. Describe types of after-death communication.
4. Demonstrate the methods used to document after-death experiences.
5. Detail current evidence-based theories on the afterlife.
6. Explain the concept of reincarnation and its varying belief systems.

WEEK ONE: General Overview of the Course

After-Death Communication

- Types of After-Death Communication (ADC)
- ADC in the Digital Age

WEEK TWO:

Near-Death and Out-of-Body Experiences

- Medical Professionals weigh in on NDEs
- How NDEs change those that experience them

WEEK THREE:

Reincarnation

- Cultural differences in reincarnation beliefs
- Evidence of Past Lives

WEEK FOUR:

Pets in the Afterlife

- What happens to our pets after they die?

WEEK FIVE:

Psychics, Mediums, and Channeling

- Evidence-based Mediumship
- Do you need special abilities to communicate with those in the afterlife?

Q&A Session - Wrap-Up/Conclusion
