

## THOUGHT PROVOKING FILMS

Concise explanations of key moral theories will be given in brief Power Point lectures at the beginning of each class. Each key theory considered will be accompanied by a film demonstrating the use of that theory. In films viewed in the second half of the class multiple theories will be compared for solutions to the same problem. Decision-making processes for today and the influential nature of films will also be included. Each film is chosen based on its reception among film critics and movie goers in addition to its topic content. Film information sheets will be provided by email. Various discussion formats will be considered. Some films contain adult content/language.
