

Our course on “Caste” will take Isabel Wilkerson’s study of this topic and break it into readable portions over the course of five weeks. Her argument in the book is that many Americans have been mostly unconscious of the machinations of caste.

Our reading is to become more familiar how this theme has been at play over time and how we believe it may have influenced our perceptions and actions in the world. This class should be viewed as an introduction to this topic, rather than an in-depth dive into a complicated matter.
