

Bird Watching Club

Course Description

The Bird watching club is for birdwatchers with various levels of experience. The course will mainly be going outside and watching birds. We try to have speakers on various birding topics such as using e-bird, bird photography, or bird feeding. Weather permitting there will be bird walks on Saturday.

The first meeting will be an introductory session, and the group will decide on the weekly topics or walks.

Weekly Layout:

Organizational Meeting - Group to discuss, modify, and approve bird walk schedule
